

# EFL603-HV-6

## HIGH CAPACITY ELECTRIC COUNTERBALANCED FORKLIFT 6.0T

 6000 kg  3000 mm  309 V Li-Ion

The EFL503–703HV Series is purpose-built for industries that demand strength, reliability, and safety in extreme working conditions — such as steel production, construction materials, ports, and heavy logistics. Its dual-wheel front axle enhances traction and balance when transporting bulky materials on uneven or slippery ground. With its fast 1C charging capability and long battery life (up to 4000 cycles), it is the ideal solution for multi-shift operations that require continuous power and mi...

SPECIFICATION	REF	UNIT	VALUE
Battery type			Li-Ion
Battery nominal capacity		Ah	228
Battery voltage		V	309
Load capacity	Q	kg	6000
Load centre distance	c	mm	600
Service weight		kg	9250
Retracted mast height	$h_1$	mm	2480
Lift height	$h_3$	mm	3000
Height, mast extended	$h_4$	mm	4470/3965
Overall length		mm	4720
Overall width	$b_1/b_2$	mm	2028
Length to face of forks	$I_2$	mm	3500
Fork dimensions	s/e/l	mm	60×150×1220
Turning radius		Wa	3235
Operator type			Seated
Load distance, centre of drive axle to fork		mm	603.5

## High Performance: High speed and high gradeability

High-voltage Li-ion batteries enable more power delivery to motors, improving acceleration and travel speeds for high-capacity trucks. PMSMs complement this with rapid response times, swiftly reaching required speeds and torques. This combination of PMSM and high voltage can provide stable and strong power output, which further gives high-capacity trucks excellent climbing capabilities ensuring that the forklift can cope with various applications with ease.

The high-voltage model offers a 1.5-2 times performance improvement over the low-voltage model. Taking the 10-ton model as an example:

100% improvement in travel speed for high voltage models in laden and unladen conditions.

The high-voltage model demonstrates a 45% faster lifting speed.

100% improvement in gradeability when unladen, 45% improvement when laden for high voltage models.

## Energy Efficiency: extended runtime and fast charging

High-voltage Li-ion batteries have high energy density and can store more electrical energy within a compact volume. High-voltage systems consume less energy and provide longer battery running time comparing low-voltage systems. Notably, these high-voltage Li-ion batteries boast an impressive cycle life of up to 4000 cycles, ensuring long-term durability and minimizing the need for battery replacements.

The PMSMs incorporate advanced control technology to optimize motor efficiency. Unlike traditional AC motors, PMSMs have higher energy conversion efficiency and reduce energy waste. This means that high-capacity trucks can work continuously for prolonged hours at lower costs.

Equipped with fast charging capabilities, high-capacity trucks offer a remarkable charging experience. The high-voltage models are compatible with vehicle-grade charging stations and support 1C charging rating, allowing them to be fully charged in as fast as 1-1.2 hours. This minimizes downtime and maximizes productivity, making it ideal for multi-shift operations

Lithium batteries present considerably lower charging costs than fuel expenses. The integration of high-voltage and PMSM technology achieves up to 15% greater electricity savings versus traditional lithium and AC technology configurations. This significantly reduces long-term energy consumption costs.

## Safety Assured: Battery, motor protection, monitoring and mast buffering

Both high-voltage lithium batteries and PMSM employ multiple protective measures to ensure safe operations including overcharge protection, over-temperature monitoring, short-circuit protection, etc. minimizing the risk of potential hazards and maximizing operational safety.

The central controlling module- VCU (Vehicle Control Unit) extends the safety of the high-voltage forklifts. VCU provides precise control and real-time monitoring of critical parameters to ensure the truck operates within safe limits.

It also features turn speed control, which adjusts the forklift's speed based on the turning angle, ensuring stability during turns. An over-speed alarm alerts the operator if the forklift exceeds the safe speed limit.\*

The high-capacity forklift mast is equipped with a hydraulic buffering system that ensures smooth lifting and lowering of loads. With controlled deceleration, the fork movement is smooth with no abrupt stops that could damage the load or cause operator discomfort. This feature enhances operational safety and prolongs the lifespan of the mast components.

## Low maintenance: Longer battery life span

Operating at a higher voltage allows the battery to be designed with fewer individual cells. With fewer components and a simpler design, the risk of battery failure is lowered.

Thanks to advanced BMS (Battery Management System) which helps to regulate and monitor high-voltage battery, these batteries tend to have a longer life than low-voltage lithium batteries, reducing the need of battery replacement.

The brushless, simple rotor design of PMSM eliminates mechanical wear from brushes and commutators. This durable, low-friction construction requires minimal periodic maintenance, reducing associated labor costs and downtime.

## Strong adaptability adaptable to harsh outdoor weather conditions

Experience uninterrupted productivity through rain, puddles, and damp conditions with the overall IPX4 rating. Plus an exceptional IP67 rating for high-voltage components. Engineered to withstand harsh temperature, high-capacity trucks offer an ambient temperature range of -20 °C ~40 °C allowing them to perform no matter climate.

Battery heating when charging comes as a standard function for high capacity models, which is activated when the surrounding temperature is below zero to always offer an optimal temperature range for efficient and safe charging even in cold weather conditions.

The dual front wheels is a standard configuration on several models offering a wider base of support, which greatly improves the forklift's stability. Considering the capacity loads of the high-capacity trucks, the weight of the load is more evenly distributed across a larger surface area. The increased ground contact area provided by the dual wheels enhances traction. This is particularly beneficial in environments where the floor may be slippery or uneven while operating outdoors, ensuring that the forklift can maintain a firm grip and operate safely. This not only helps in maintaining balance but also minimizes the stress on individual tires, extending the lifespan of the tires.

## VDI Chart

	SPECIFICATION	REF	UNIT	VALUE
1.4	Operator type			Seated
1.5	Load capacity	Q	kg	6000
1.6	Load centre distance	c	mm	600
1.8	Load distance, centre of drive axle to fork		mm	603.5
1.9	Wheelbase		mm	2300
2.1	Service weight		kg	9250
2.2	Axle loading, laden front/rear		kg	13755/1495
2.3	Axle loading, unladen front/rear		kg	4610/4640
3.1	Tyre type			Pneumatic

## Options

ITEM	OPTIONS (optional items marked in yellow)
Fork dimension	1220mm Hook-on forks   Customized fork length/non-standard accessories
Fork carriage width option	Customized fork carriage width
Backrest height	1995mm load backrest
Seat type	Upgraded suspension seat with armrest + headrest + safety seat-belt switch   Grammer MSG65-531 (suspension seat with armrest + safety belt switch)
Attachments	Hook on type sideshift   Hook on type fork positioner with sideshift   Fork positioner with pin type forks
Battery capacity	309V228Ah LFP battery   309V304Ah LFP battery
Charger	20kw (AC 370V-460V, 50-60HZ, 32A plug)   40kw (AC 370V-460V, 50-60HZ, 63A plug)
Buzzer	Yes
Camera	Reversing radar/reversing camera/reversing radar and camera
OPS system	Yes
USB interface	USB interface 24V
Overhead guard	Standard overhead guard
Turn speed control	Yes
Heating system during lithium battery charging	Yes
Mast lifting and lowering buffer	Yes

ITEM	OPTIONS (optional items marked in yellow)
Mechanical lever	Yes
Rear grab handle with horn	Yes
Lighting package	LED front working light, turn signal light, market light, LED rear working light, strobe warning light   LED working lights on mast   Rotating warning light / rotating buzzer warning light   Rear/rear and front blue lamp   Front fog light   Customized area warning lamp
Options	Fingertips   Cigarette lighter socket 12V5A
Tyres type	Pneumatic   Solid tyres / non-marking tyres
